

We are glad to announce that Polyend will be represented by its official US distributor Black Market Modular on Moogfest 2018 between 17th and 20th May in Durham, North Carolina.

You'll be able to see and test our Seq MIDI Sequencer and Poly MIDI to CV converter couple. Also, the fruit of almost year-long cooperation with our friends from Dreadbox - Medusa Synthesizer will be available in its early demo form.

Additionally, we'll be honored by an hour-long presentation of our instruments prepared by the one and only Richard Devine! He'll be showcasing and discussing with the audience all three of our products including the acclaimed Perc Pro Drumming Machine. Unfortunately, we're unable to appear on Moogfest in person but we hope you'll enjoy the musical gig and presentation of our instruments led by Richard. We'd wish to be there!

Come by, meet the cool guys from Black Market Modular, chat with them about our products, see and play with them.

Polyend Team
